

DH-3

Annual Ryegrass

Seeding Rate:

30-40 lbs. per acre/alone
4-8 lbs per acre/mixture

- Quick establishment
- High yielding
- Consistent forage yield throughout season
- Excellent palatability
- Good crown rust resistance
- Improved cold tolerance
- Good transition back to warm-season grasses

DH-3 diploid annual ryegrass is the result of a polycross between Marshall, Ribeye, and TAM90 annual ryegrasses.

DH-3 combines the quick establishment and forage yield of Ribeye, the crown rust resistance of TAM90 and the frost tolerance and consistent yield of Marshall. Tested throughout the South, **DH-3** annual ryegrass is proving to be a real contender among new forage annual ryegrasses.

DH-3 exhibits high forage yield, excellent seedling vigor, and medium maturity, allowing consistency in forage yield throughout the season with good transition back into warm-season forage grasses.
